## 2018 Crime in Utah Report Introduction

This *2018 Crime in Utah* report is published by the Utah Department of Public Safety's Bureau of Criminal Identification (BCI) to give governmental leaders and citizens a better understanding of criminal activity in the state. The report is a compilation of crime data reported by local law enforcement agencies throughout the state. The data is reported under the guidelines of the Uniform Crime Reporting (UCR) program, a national program which uses generic crime definitions to ensure that crime data is comparable across political boundaries. BCI forwards data collected from Utah law enforcement agencies to the FBI, who in turn combines it with data from other states to compile and publish an annual report called *Crime in the United States*.

UCR data is collected in two formats: "Summary Reporting" (Summary), which has undergone only minor changes since the 1930s, and "National Incident Based Reporting" (NIBRS) which uses computerized data systems to collect more detailed information. 75 agencies in Utah submitted NIBRS data in 2018, accounting for 51.72% of the agencies and covering 74.62% of Utah's population. 53 agencies in Utah (or 36.55%) submitted Summary data, while 17 agencies (or 11.72%) did not submit any data.

In the Summary system, crimes are divided into two categories: *Part I Crimes*, which include criminal homicide (murder, non-negligent manslaughter, and manslaughter by negligence), rape (which is defined by the UCR program as the carnal knowledge of a person, without the consent of the victim, including instances where the victim is incapable of giving consent because of his/her age or because of his/her temporary or permanent mental or physical condition), robbery, aggravated assault, burglary, larceny-theft, motor vehicle theft, and arson; and *Part II Crimes*, which include all other non-traffic crimes. The Part I crimes, except manslaughter by negligence, make up the "crime index" used by the FBI to track our nation's crime situation. Therefore, these crimes are often referred to as "Index Crimes". The number of known offenses and arrests are reported on Part I Crimes, while only arrests are reported on Part II Crimes. If multiple Part I offenses are committed in the same criminal episode, only the most serious offense is reported.

The Part I Crimes are also categorized as *violent crimes* (murder and non-negligent manslaughter, rape, robbery, and aggravated assault) and *property crimes* (burglary, larceny-theft, motor vehicle theft, and arson) for analysis purposes.

**The statistics presented in this report are only as accurate as the data provided by the local law enforcement agencies.**

Some law enforcement agencies in Utah do not submit their crime statistics to BCI, but forward them directly to the FBI. Such entities include military installations, national parks, and tribal lands. To view the crime statistics for such agencies, please refer to the FBI's *Crime in the United States* publication.

The FBI has made the determination to transition from Summary reporting to solely NIBRS reporting by January 2021.

## Acknowledgements

The Department of Public Safety would like to acknowledge and recognize the following law enforcement agencies for their dedication to the UCR NIBRS and Summary programs. Without their efforts to provide BCI with their crime data, this report would not be possible.

## Crime Factors

In order to produce a meaningful statistical profile of crime within the State of Utah, each law enforcement agency is asked to participate in the UCR program, reporting data on crimes that became known to law enforcement within their jurisdiction. Utah uses the same offense classifications used in the national UCR program so that the resulting crime statistics are comparable to those compiled across the nation.

In the UCR program, crimes are divided into two categories: Part I Crimes (or “Index Crimes”), which include homicide and non-negligent manslaughter, rape, robbery, aggravated assault, burglary, larceny, motor vehicle theft, and arson; and Part II crimes, which include all other non-traffic offenses. Only arrest data is collected on the Part II crimes.

Crime rates in this publication are based on the stable population of the municipality. Although transient populations definitely impact the volume and nature of crime, it is impractical to base crime rate calculations on these fluctuating populations. Therefore, a municipality with high transient populations may have a higher crime rate than another municipality of similar size. *Characteristics of the community influence criminal activity and should be considered when attempting to interpret crime statistics presented herein.* Below are some factors which will affect the type and volume of crime that occurs and is subsequently reported in a given location.

- Density and size of the population of the community and of the surrounding area.
- Relative stability of the population, including seasonal, commuter, and other transient populations.
- Composition of the population, particularly with reference to age, sex, and socioeconomic status.
- Economic status, including job availability and mores of the population.
- Climate, including seasonal weather conditions.
- Cultural conditions such as educational levels, recreational opportunities, and religious characteristics.
- Effective strength of law enforcement, including cooperation of neighboring agencies, reservations and federal law enforcement agencies.
- Administrative and investigative emphasis and efficiency of the local law enforcement agency, including the degree of adherence to crime reporting standards.
- Policies of other components of the criminal justice system (i.e., prosecutorial, judicial, correctional, and probational).
- Attitudes of the public toward law enforcement and their crime reporting practices.

*This report reflects crime in Utah as far as it is completely  
and accurately reported by local law enforcement agencies to  
the Utah Bureau of Criminal Identification.*

## Index Crimes

Data for “Index Crimes by Agency” is compiled from information that local agencies submit to BCI. Refer to the Glossary section for definitions of the offenses listed below. Offenses are defined according to the FBI UCR definitions, which may vary from state or local crime statutes.

Law enforcement agencies (state, county, and city) report the number of offenses that become known to them in the following crime categories:

1. Criminal Homicide
  - a. Murder and Non-Negligent Manslaughter
  - b. Manslaughter by Negligence (not an Index Crime)
2. Rape
  - a. Rape
  - b. Attempts to Commit Rape
  - c. Historical Rape
3. Robbery
  - a. Firearm
  - b. Knife or Cutting Instrument
  - c. Other Dangerous Weapon
  - d. Strong-Arm (Hands, Fists, Feet, etc.)
4. Assault
  - a. Firearm
  - b. Knife or Cutting Instrument
  - c. Other Dangerous Weapon
  - d. Hands, Fists, Feet, etc. (Aggravated Injury)
  - e. Simple Assault (not an Index Crime)
5. Burglary
  - a. Forceable Entry
  - b. Unlawful Entry - No Force
  - c. Attempted Forceable Entry
6. Larceny-Theft
7. Motor Vehicle Theft
  - a. Autos
  - b. Trucks and Buses
  - c. Other Vehicles
8. Arson
9. Human Trafficking, Commercial Sex Acts
10. Human Trafficking, Involuntary Servitude

## **Summary Based Reporting and National Incident Based Reporting**

Law enforcement agencies submit their statistical information in one of two different formats: the older “Summary Reporting” system and “National Incident Based Reporting” which is also referred to as “IBR” or “NIBRS”.

Generally, offenses of law occur singly as opposed to many being committed simultaneously. In these single-offense situations it must be decided whether the crime was one of the “Index Crimes”; if so, the offense is scored accordingly (homicide, rape, robbery, etc.). However, if several offenses are committed at the same time by a person or a group of persons, depending on which type of UCR reporting an agency participates in may vary the data collected. For example, during a convenience store robbery the store clerk is killed, a customer assaulted, merchandise stolen, and a customer’s car stolen. Agencies that submit their data using the Summary method must report this crime under the guidelines of the FBI’s hierarchy rule, in which only the most serious offense is counted and the others are ignored for statistical reporting purposes. In the example above, only the murder of the clerk would be counted in the agency’s UCR statistics and for statistical reporting purposes it would be as if the other crimes did not occur.

Agencies utilizing the NIBRS method do not use the hierarchy rule, so all criminal events in an incident are counted statistically. In the example above, the homicide, the assault, the theft, and the motor vehicle theft are all counted.

The data shown in the section “Index Crimes by Agency” reports the statistics for all agencies *as if they were all reporting using the Summary format*. The data from the NIBRS agencies is converted into Summary data that the agency would have reported had it been a Summary agency. The uniformity in reporting allows for more direct comparisons between agencies.

When viewing the data for the NIBRS agencies, starting on page 16, keep in mind that direct comparisons between the “Index Crimes by Agency” and the NIBRS data cannot be made because of the different nature of their methodologies. *If an agency submits data using the NIBRS format, the data seen for that agency in the NIBRS section is more accurate than the data seen for that same agency in the “Index Crimes by Agency” section.*

## Scoring Offenses

Using the Summary format, only those offenses *that became known to law enforcement* for Part I Crimes and simple assault are counted under the UCR program. The method of scoring offenses varies with the type of crime committed.

For murder and non-negligent manslaughter, negligent manslaughter, rape, aggravated assault and simple assault, one offense is scored for each victim, regardless of the number of offenders involved. For example, two offenders could be involved in the murder of one victim and in this case only one murder would be scored. If one offender murdered two victims, two homicides would be scored.

For robbery and larceny, one offense is scored for each distinct operation which is separate in time and place. The number of victims in any one operation does not determine the number of offenses. For example, if seven patrons in a bar are robbed, only one robbery is scored.

For burglary, one offense is scored for each structure which is illegally entered.

For motor vehicle theft, one offense is scored for each vehicle stolen.

In the Summary Reporting system, arrest data is counted for 29 "Part II Crimes". Part II Crimes include, but are not limited to, drug offenses, DUI, forgery, counterfeiting, fraud, etc. The Summary Reporting system only counts the number of persons arrested. The hierarchy rule is also applied to scoring the arrests. If one person is arrested for homicide, rape, motor vehicle theft, possession of narcotics and weapon law violations, only the arrest for the homicide is counted, as that is the most serious crime.

## 2018 Summary Analysis

The population figures used in this report are based on data received from the U.S. Census Bureau. The U.S. Census Bureau's website for population totals and the methodology used is located here: <https://www.census.gov/quickfacts/fact/table/UT/PST045217>

- In 2018, a total of 80,622 index crimes were committed, which indicates an 11.97% decrease in the overall number of index crimes from 2017.
- The overall number of violent crimes increased 0.36%. Violent Crime changes were as follows: Homicides decreased by 8.00%, Rapes increased by 4.49%, Robberies decreased by 16.96%, and Aggravated Assaults increased by 5.33%.
- Total property crime decreased by 12.99%. Burglary saw a decrease of 16.42%, Motor Vehicle Theft decreased by 17.15%, Arson decreased by 15.38%, and Larceny saw a decrease by 11.83%.
- Firearms were used in 40.63% of the homicides reported.
- 15.69% of the homicides reported involved family relationships, while 84.31% did not.
- The value of property reported stolen in 2018 amounted to \$123,519,149. Of that amount \$38,213,336 was recovered, indicating a 30.94% recovery rate.
- Residential burglaries accounted for approximately 64.77% of all burglaries. Of all residential burglaries, approximately 60.29% were known to be committed during daytime hours (6:00 am to 6:00 pm), 34.50% were known to be committed during nighttime hours (6:00 pm to 6:00 am), and the time of day could not be established for approximately 5.21% of reported residential burglaries.
- Reported hate crimes increased from 35 in 2017 to 52 in 2018, a 48.57% increase.
- There were 111,836 arrests reported in 2018. This is a 4.25% decrease from 2017.

## Crime Clock

The Crime Clock should be viewed with care. Being an aggregate representation of UCR Summary data, it is designed to convey the annual reported crime experience by showing the relative frequency in occurrence of the Index Crimes (also known as Part I Crimes). This mode of display should not be taken to imply regularity in the commission of the Part I Offenses; rather, it represents the annual ratio of crime to fixed time intervals.

On average, one Index Crime is reported every 6.52 minutes in the state of Utah.

## Crime Cycle

The Crime Cycle should be viewed with care. Being an aggregate representation of UCR Summary data, it is designed to convey the annual reported crime experience by showing the relative frequency in occurrence of the Index Crimes (Part I Crimes). This mode of display should not be taken to imply regularity in the commission of the Part I Offenses; rather, it represents the annual ratio of crime to fixed time intervals.

*Average number of Index Crimes reported in a 24-hour period in the state of Utah.*

## National Incident Based Reporting (NIBRS)

The concept of National Incident Based Reporting, also referred to as IBR or NIBRS, was developed by the FBI in the 1980s to provide more comprehensive data for the management of crime in our society. In a NIBRS system, computerized data systems are utilized to collect more detailed information about the crimes that occur. The availability of detailed information stored in a law enforcement agency's records management system database makes for a more comprehensive analysis of criminal activity. The Utah Incident Based Reporting System was implemented in 1991; 75 Utah agencies submitted NIBRS data for this report. The data accepted by the Utah repository is also forwarded to the FBI's NIBRS repository where it is used to depict criminal activity nationwide.

The data from the NIBRS system is not directly comparable to the data from the Summary reports. Information about each incident and arrest is collected for 24 offense categories comprised of 52 Group A offenses. All offenses that occur in a criminal episode are reported, not just the most serious offense (as opposed to the "hierarchy rule" outlined on page 10). Only arrest data is collected for 10 Group B crimes.

Summary mostly gathers information on the eight "Index Crimes" listed on page 9. NIBRS gathers the "Index Crimes" as well as the following information:

Group A

Since only 75 of the reporting agencies submit NIBRS data, NIBRS statistics reflect only crimes reported by those jurisdictions. They do not reflect statewide data. Criminal incidents reported by the Utah Division of Wildlife Resources, Utah Highway Patrol, Utah State Parks and Recreation, and the Utah Transit Authority PD may have occurred anywhere in the state where the agencies have jurisdiction. For a list of all agencies that submit NIBRS data, see page 16.

Since only 75 of the reporting agencies submit NIBRS data, NIBRS statistics reflect only crimes reported by those jurisdictions. They do not reflect statewide data. Criminal incidents reported by the Utah Division of Wildlife Resources, Utah Highway Patrol, Utah State Parks and Recreation, and the Utah Transit Authority PD may have occurred anywhere in the state where the agencies have jurisdiction. For a list of all agencies that submit NIBRS data, see page 16.

## Clearance Rates

\*An offense cleared in 2018 may have occurred in a previous year.

*Clearance by Arrest:* The FBI's UCR program states that "an offense is cleared by arrest or solved for crime reporting purposes when at least one person is 1) arrested, 2) charged with the commission of the offense; and 3) turned over to the court for prosecution (whether following an arrest, court summons, or police notice)". Although no physical arrest is made, a clearance may be reported when the offender is a person under 18 years of age and is cited to appear in juvenile court or before other juvenile authorities.

*Clearance by Exception:* The FBI's UCR program states that "in certain situations, law enforcement is not able to follow the three outlined steps under 'Clearance by arrest' to clear offenses known to them", however; if the following questions can be answered 'yes', the offense is considered to be 'cleared by exception'.

1. Has the investigation definitely established the identity of the offender?
2. Is there enough information to support an arrest, charge, and turning over to the court for prosecution?
3. Is the exact location of the offender known so that the subject could be taken into custody now?
4. Is there some reason outside law enforcement control that precludes arresting, charging, and prosecuting the offender?

Since only 75 of the reporting agencies submit NIBRS data, NIBRS statistics reflect only crimes reported by those jurisdictions. They do not reflect statewide data. Criminal incidents reported by the Utah Division of Wildlife Resources, Utah Highway Patrol, Utah State Parks and Recreation, and the Utah Transit Authority PD may have occurred anywhere in the state where the agencies have jurisdiction. For a list of all agencies that submit NIBRS data, see page 16.

## Summary Reporting

The information in this section is presented in the Summary format. Information from NIBRS agencies is converted into what that agency would have submitted had it been a Summary agency. This allows for a more direct comparison between agencies.

Crime Rate per 1,000 indicates how many crimes occurred per every 1,000 residents of the jurisdiction. However, this does not always reflect an accurate picture of crime in the jurisdiction; it also does not necessarily mean that the residents of that jurisdiction are more or less likely to commit crime than residents of other jurisdictions.

Colleges and universities with their own police departments submit information about crimes that occur on campus property. However, these agencies have a “zero” population as the Census Bureau considers the students to be residents of the city or unincorporated area in which they live. Crimes reported by campus police departments are not always committed by students of the school. Many events that occur on a college or university campus can bring non-students onto the school’s property. The makeup of the area immediately surrounding the college/university must also be taken into consideration.

Some agencies submitting data to Utah’s UCR database include agencies that cover more than one city or county. Such agencies include Utah Division of Wildlife Resources, Utah Highway Patrol, Utah State Parks and Recreation, Utah Transit Authority PD, drug task forces, and other such agencies.

Throughout the course of a calendar year, existing law enforcement agencies could disband and new agencies could be formed. Some agencies do not always submit a full 12 months of data, while some agencies submit a combination of both Summary and NIBRS data.

The Arrest Data by Agency and the Adult and Juvenile Arrest totals are also presented in the Summary format so that more direct comparisons can be made between agencies.

## Index Crimes by Agency

Data for the Index Crimes by Agency is compiled from information that local agencies submit to BCI. Refer to the Glossary section for definitions of the offenses listed below. Offenses are defined according to the FBI UCR program definitions, which may vary from the state crime statutes. Data seen here is reported as if each agency reported data using the Summary format.

\*Rape as seen in this section follows the definition of “the carnal knowledge of a person, without the consent of the victim, including incidents where the victim is incapable of giving consent because of his/her age or because of his/her temporary or permanent mental or physical incapacity”. Rape as reported under the Index Crimes by Agency section is not directly comparable to the FBI’s *Crime in the United States* publication for rapes which includes other NIBRS sex offenses under its “revised” definition for rape. For more information regarding other types of sex offenses, please refer to the NIBRS section of the Crime in Utah report.

## Arrest Data by Agency

Arrest data counts the number of persons arrested, not the number of charges that person is arrested for; nor does it count the number of offenses cleared by the arrest. If a person is arrested for more than one offense the reporting agency counts only the arrest for the most serious charge. An adult is a person 18 years of age or older; a juvenile is a person aged 17 or younger. Law enforcement agencies will report only those arrests made for offenses that occurred within their own jurisdictions.

## Arrest Data by Offense

Arrest data counts the number of persons arrested, not the number of charges that person is arrested for; nor does it count the number of offenses cleared by the arrest. If a person is arrested for more than one offense the reporting agency counts only the arrest for the most serious charge. An adult is a person 18 years of age or older; a juvenile is a person aged 17 or younger. Law enforcement agencies will report only those arrests made for offenses that occurred within their jurisdictions.

South Salt Lake Police Department

## Law Enforcement Officers Killed and Assaulted

When reviewing the information on Law Enforcement Officers Killed and Assaulted (LEOKA) the following needs to be considered:

- The data in the tables and charts reflect the number of victim officers, not the number of incidents or weapons used.
- The UCR program considers any part of the body that can be used as weapons (such as hands, fists, or feet) to be personal weapons and designates them as such in its data.
- Not all agencies submit data on the number of officers assaulted in their jurisdiction.

## Law Enforcement Employees per Agency

Because of law enforcement's varying service requirements and functions as well as the diverse demographic traits and characteristics of jurisdictions, use caution when drawing comparisons between agency staffing levels based upon police employment data from the UCR program. It must be remembered that the totals given for sworn officers for any particular agency reflect not only the patrol officers on the street but also officers assigned to various other duties such as those in administrative and investigative positions as well as those assigned to special teams.

### Data Collection:

- Each year, law enforcement agencies in Utah report the total number of sworn law enforcement officers and civilians in their agency as of October 31<sup>ST</sup> to the UCR program.
- The UCR program defines law enforcement officers as full-time, sworn personnel that possess full arrest powers, and carry a weapon. Their primary duties include responding to routine calls for police service, emergency situations, or crime scenes; performing routine patrol; rendering emergency services, enforcing criminal laws and traffic regulations; and investigating violations of criminal laws and traffic accidents. These employees' salaries are paid from law enforcement funds. In addition, correctional officers and police cadets are included in the officer counts *only* if they are sworn and possess full arrest powers.
- Civilian counts are inclusive of all full-time employees of the agency, e.g., dispatchers, clerks, and meter attendants. These employees' salaries are paid from law enforcement funds. Furthermore, correctional officers or jailers that have no police or arrest powers outside the jail are counted as civilians as long as their salaries are paid from the funds of the law enforcement agency.

### Overview:

- In 2018, sworn officers accounted for 70.88% of all law enforcement personnel in Utah.
- The number of full-time law enforcement employees (civilian and sworn) per 1,000 inhabitants in Utah for 2018 was 2.07; the rate of sworn officers was 1.47 per 1,000. The UCR program computes these rates by taking the number of employees, dividing by the population of an agency's jurisdiction, and multiplying by 1,000. *These numbers do not include the agencies that did not submit employee data in 2018.*
- Female employees accounted for 60.01% of all full-time civilian law enforcement employees in 2018.
- Males accounted for 92.29% of all full-time sworn law enforcement officers in 2018.
- As of October 31, 2018 there were 4,633 sworn law enforcement officers in Utah. Female officers made up 7.71% (357 officers) with male officers making up 92.29% (4,276) of the sworn law enforcement officers employed full-time in Utah. *These numbers do not include the agencies that did not submit employee data in 2018.*

## Glossary

The following terms are defined according to the FBI's Uniform Crime Reporting program. These definitions may be found in the FBI's Summary Reporting System User Manual and the NIBRS User Manual located at [www.ucr.fbi.gov](http://www.ucr.fbi.gov).

**Adult:** An individual 18 years of age or older.

**Aggravated Assault:** An unlawful attack by one person upon another wherein the offender uses a weapon or displays it in a threatening manner, or the victim suffers obvious severe or aggravated bodily injury involving apparent broken bones, loss of teeth, possible internal injury, severe laceration, or loss of consciousness.

**All Other Offenses:** All crimes that are not Group A offenses and not included in one of the specifically named Group B crime categories, excluding traffic offenses. Agencies that submit Summary based data record all arrests that cannot be categorized under any other Part II category in "All Other Offenses".

**American Indian or Alaska Native- Race:** A person having origins in any of the original peoples of North and South America (including Central America) and who maintains cultural identification through tribal affiliation or community recognition. The other four categories of race are Asian, Black or African American, Native Hawaiian or Other Pacific Islander, and White.

**Arson:** To unlawfully and intentionally damage or attempt to damage any real or personal property by fire or incendiary device.

**Asian- Race:** A person having origins in any of the original peoples of the Far East, Southeast Asia, the Indian subcontinent including, for example, Cambodia, China, India, Japan, Korea, Malaysia, Pakistan, the Philippine Islands, Thailand, and Vietnam. The other four categories of race are American Indian or Alaska Native, Black or African American, Native Hawaiian or Other Pacific Islander, and White.

**Bad Checks:** Knowingly and intentionally writing and/or negotiating checks drawn against insufficient or nonexistent funds. Does not include counterfeit checks or forged checks.

**Black or African American- Race:** A person having origins in any of the black racial groups of Africa. The other four categories of race are American Indian or Alaska Native, Asian, Native Hawaiian or Other Pacific Islander, and White.

**Blackmail:** see Extortion/Blackmail

**Bribery:** The offering, giving, receiving, or soliciting of anything of value (e.g. a bribe, gratuity, or kickback) to sway the judgment or action of a person in a position of trust or influence.

**Burglary/Breaking and Entering:** The unlawful entry into a building or other structure with the intent to commit a felony or a theft.

**Clearance:** Incidents may be cleared by arrest or by exceptional means:

*Clearance by arrest:* An offense is cleared by arrest or solved for crime reporting purposes when at least one person is 1) arrested, 2) charged with the commission of the offense; and then turned over to the court for prosecution (whether following arrest, court summons, or police notice). Although no physical arrest is made, a clearance may occur when the offender is a person under 18 years of age and is cited to appear in juvenile court or before other juvenile authorities.

*Clearance by Exception:* The FBI's Uniform Crime Reporting Program states that "in certain situations, law enforcement is not able to follow the three outlined steps under 'clearance by arrest' to clear offenses known to them". However, "if the following questions can be answered 'yes', the offense is considered to be 'Cleared by Exception':

1. Has the investigation definitely established the identity of the offender?
2. Is there enough information to support an arrest, charge, and turning over to the court for prosecution?
3. Is the exact location of the offender known so that the subject could be taken into custody now?
4. Is there some reason outside law enforcement control that precludes arresting, charging, and prosecuting the offender?

Some examples of exceptional clearance situations (these examples are not all inclusive):

- Death of the offender (suicide, killed by law enforcement, murder-suicide situation, natural causes)
- Deathbed confession by offender
- Offender already in custody or serving sentence for another offense
- Extradition denied
- Victim refuses to cooperate in prosecution

**Crime Rate Per 1,000:** Number of crimes committed for every 1,000 residents. Breaking down the number of crimes by size of population is one way to gauge how an agency's crime rates compare with those of other agencies. Crime Rate per 1,000 is calculated by dividing the agency's number of crimes by the agency's population and multiplying the result by 1,000. ((Crimes/Population) \*1,000)

**Curfew/Loitering/Vagrancy Violations:** The violation of a court order, regulation, ordinance, or law requiring the withdrawal of persons from the streets or other specified areas; prohibiting persons from remaining in an area or place in an idle or aimless manner; or prohibiting persons from going place to place without visible means of support.
